

1. c. All of these training elements are important, but studies show the most common reason employees don't follow rules in the workplace is because they don't know why the rules *are* important.

2. e. The specific PPE addressed by CDC and OSHA guidelines include: gloves, which protect the hands; gowns or aprons, which protect the skin and/or clothing; masks and respirators, which protect the mouth, nose and respiratory tract; goggles, which protect the eyes; and face shields, which protect the entire face. Scrubs are considered clothing — they do not protect you from exposure to bloodborne pathogens or workplace exposures.

3. a. Sweat has never been proven to transmit disease and doesn't contain enough of any infectious disease to require special handling.

4. d.

5. a. true.

6. b. Both gloves must be removed and discarded promptly after use.

7. c. The room you are in has nothing to do with selection of PPE, since minor procedures may take place in an OR and large procedures with great exposure to blood make take place in a treatment room in the emergency department.

8. b. false.

9. a. true. Change masks after each use.
